*For Immediate Release*

*Westfield* - The Westfield-Barnes Regional Airport announces that the Single Environmental Impact Report for three upcoming projects at Westfield-Barnes Regional Airport was published in the Environmental Monitor on December 7, 2022.

The Single Environmental Impact Report (SEIR) analyzes potential environmental impacts of three proposed projects. The projects proposed are to widen and realign the southern segment of Taxiway B, realign a northern segment of Taxiway B, acquire six off-airport aviation easements for obstruction removal off Runway 15 end, and construct a new taxiway and apron to the existing Southwest Quadrant area of the airport. These projects will improve operational efficiency and enhance safety at Westfield-Barnes Regional Airport. The projects will upgrade and improve facilities at the Airport to comply with current Federal Aviation Administration and Department of Defense standards.

Anyone who wishes to view the report and comment can access the report of the Airport's website at [www.barnesairport.com](http://www.barnesairport.com). The comment period will end on January 6, 2023, and a Final certificate will be issued on January 13, 2023.

Questions regarding access to the report can be directed to Westfield-Barnes Airport Manager Chris Willenborg at 413-572-6275 or [cwillenborg@barnesairport.com](mailto:cwillenborg@barnesairport.com)
